

## D3 – Jai Lafferty 101610772

---

**The repo containing my Distinction App can be found at:**

<https://github.com/CreDataDrivMobApp/task-d-JaiLaff>

I need to cover:

- Table Screen (won't work without an artist selected)
  - Selecting an Artist
    - o Error checking
    - o Explain that it's querying the API
    - o Select the artist
  - Table Screen (wow look at all these albums)
  - Enter details (show Wikipedia button)
  - Save the album
  - Check the saved albums table
  - Save some more albums
    - o Different Artists too!
  - Start the quiz
- 
- If time show the data model as it relates to your 9C
